

Research and transfer of technology

At the C..Lab professors and students of the product design department work together on projects. These research projects are partly internal projects and partly projects with external partners. The C...Lab is also in charge of organizing conferences, seminars and workshops, of editing publications and advising companies and institutions on technology transfer.

The C...Lab has access to the technical equipment of the Product Design Department:

- Computerpool - Macintosh, PC and Silicon Graphics / CAD/CAM, DTP, Graphics and Multimedia
- 3D Laser scanner
- CNC-model-making router
- CNC-wood machining center

Training at the CNC-wood machining center
