

dds-aktiv offers real added value for the committed cabinet-maker and joiner. The dds “belly-shop“ offers know-how for the cabinet-maker in the shape of selected technical literature, software, videos, professional seminars, exclusive study trips, as well as all sorts of things from the joiner’s shop.

The **dds-software**, technical literature and special products can be ordered with → **dds media service**, where you can also obtain the exclusive book and software catalogue.

Impressions from the dds trip for readers to Verona
Prof. Axel Müller-Schöll has been in charge of the **dds trips for readers** for years. His graphic and vivid lectures are very helpful for the visualisation of the cabinet-makers and joiners ideas and design projects.

dds trips for readers distinguish themselves not only through interesting visits to workshops, sight-seeing and lectures, but also through their exclusive side-program.

Information on workshops and dds readers trips can be obtained from the current edition of dds, from dds-online or from the → **dds-Leserservice**.
